ACTION TAKEN REPORT ON ANALYSIS OF STUDENT SATISFACTION SURVEY

The institution expects that the combined percentage of parameters “Excellent” and “Good” should be above 80% and that of “satisfactory” should be below 20%. Wherever the parameter satisfactory is greater than 20% it needs to be checked.

Therefore the following questions were taken into consideration:-

- Q4** In question number 4, students’ experience of learning with projector and audio-visual aid was asked. The faculty members have been asked to prepare more colorful and well explanatory slides and to explain topics in details.
- Q7** All students are not interested in literary work. However teachers have been asked to motivate more students and to develop the literary interest in them by increasing their participation in wall magazine activity.
- Q13** It takes some time to make students aware of ICT activities. The faculty members have been asked to increase the interest of students in ICT activity by motivating them to prepare their own videos etc. using college facilities.

The students come from schools where they have not gone through such activities. After joining this institution for the first time they are exposed to such activity and it takes some time to adjust.
